**Vascular Anaesthesia (Oxford Specialist Handbooks in Anaesthesia)** Jonathan Thompson, Richard Telford, Simon Howell

Providing a practical, current, evidence-based approach to all aspects of perioperative care for the patient with vascular disease, Vascular Anaesthesia is an essential read for all vascular anaesthetists, anaesthetic nurses and anyone else involved in the care of vascular patients throughout the world.

Vascular Anaesthesia summarizes current knowledge, particularly on interventional procedures (radiological, diagnostic, and surgical). This book also equips the trainee anaesthetist with the scientific and clinical knowledge to pass the Final FRCA examination. It enables doctors to approach vascular surgical patients with a firm understanding of a particular procedure, particularly its risks and options for perioperative management based on current best practice.

The management of the patient with vascular disease is evolving rapidly: this indispensable pocket reference is of sufficient detail to update the regular and occasional vascular anaesthetist with current best practice for particular, common clinical scenarios. The book also equips the non-anaesthetic medical, nursing, and theatre staff with knowledge and understanding of all other aspects of perioperative care.
