## Cross-Walks Icd-10 - Dsm Iv-Tr: A Synopsis of Classifications of Mental Disorders

Intended for clinical practice as well as in research, the clearly laid tables and concise explanations presented in this volume should allow fast and easy comparisons and "translations" between the latest TR version of DSM-IV and ICD-10, the two most widely used classifications of mental disorders. While the DSM and ICD classifications have grown closer over the years, there are still differences that are significant both in clinical practice and in research. The tabular cross-walks (in both directions) included here not only allow fast and accurate "translations" between the two coding systems, they also highlight and explain any differences or omissions. In a large format, with a practical spiral binding, this volume should be an easy-to-use and time-saving resource for clinicians and researchers.
