The Changing Geography of Africa and the Middle East

The Changing Geography of Africa and the Middle East

CROSS REF DEV STUDIES Both Africa and the Middle East have sought alternatives to Western models of development. The last twenty-five years have seen political independence for the states of Africa and increased economic dependence on external aid. The Middle East, resource rich and water poor, continues economically robust but politically unstable. In both regions, widespread poverty continues as does the involvement of the West.

Clearly illustrated with basic maps of the countries discussed, *The Changing Geography of Africa and the Middle East* presents a systematic review of twenty-five years of development. The book will prove an invaluable guide to the physical, economic, social and political environments of contemporary Africa and the Middle East.
