Stalingrad Battle Atlas: volume III Anton Joly

“All this will go down in Military History as a brilliant example of the enemy's operational art.”

Such were the words of Field-Marshal Paulus, talking to his former staff members shortly after the end of the battle. No one could better summarize the events that took place around Stalingrad in late November 1942.

The Red Army defeated the Wehrmacht against all odds in one of the most dramatic battles in History. How such a miracle has been made possible ? What exactly happened each single day of this giant struggle ?

The third volume of the "Stalingrad Battle Atlas" series covers Operation Uranus, the Soviet counteroffensive which ended up with German VI Army's encirclement between Don and Volga. It presents essential strategic and tactical information, including recently released archival data, and features ***especially designed maps for each day*** of active operations during this period.

Synthesizing an extremely wide range of documents and information sources, this chronological atlas seeks to reach the maximal degree of precision in describing historical reality, rendering it through a standardized set of instruments: timeline, orders of battle, unit strength returns, tactical or strategic situation maps, contextual photos, quotes from key actors. It can be used as a reference manual for searchers, as well as a guide for those who want to know the basics: Who, When, Where.

Main features:

- o Order of Battle & Strength Returns
- o Tactical & Strategic Maps
- o Unit positions with daily updates

A new perspective of the legendary battle on the Volga
