Written in Water: Messages of Hope for Earth's Most Precious Resource

Written in Water: Messages of Hope for Earth's Most Precious Resource comprises a collection of essays authored by heroes and leaders in the field of water solutions and innovations—a broad range of people from varied disciplines who have contributed their hearts and minds to bringing awareness to and conserving Earth's freshwater supply. In their own words, authors tell of such tragedies as water slavery, drought, or contamination, as well as their own professional struggles and successes in pursuit of freshwater solutions.

Contributors include: Alexandra Cousteau, social environmental advocate and granddaughter of legendary marine scientist Jacques Cousteau; Peter Gleick, environmental visionary and winner of a 2003 MacArthur "genius grant"; Bill McKibben, bestselling author and winner of a Guggenheim fellowship; Sylvia Earle, oceanographer and *Time* magazine's first "hero for the planet"; and Christine Todd Whitman, former head of the Environmental Protection Agency, along with more than a dozen other notable people.

These visionaries' stories touch, surprise, and amaze as they help us see the essential role played by water in our world, our lives, and our future. These are all people who are thinking far beyond the realm of self; they are devoted to creating a better world for all of us.
