The First Brain: The Neuroscience of Planarians Oné R. Pagán

Planarians, a class of flatworm, are extraordinary: they possess the remarkable ability to regenerate lost body parts, including complete regeneration of the nervous system. If cut into pieces, each piece of the planarian can regenerate into a complete organism. They are also unique among invertebrates in that they display addiction-like behaviors to many drugs abused by humans. Because of these distinct neurological traits, the planarian is often used as an animal model in neurological research, being used most recently for developments in neuropharmacology.

The First Brain is a discussion of how planarians have been used in neuropharmacology, and what role they have played in scientific developments that have a high impact on our culture. Planarians have been the animal models for research in drug addiction, antidepressant development, and various other topics in biology, neurobiology, and even zoology. Pagán uses these flatworms as a framework to explore the history of biological research. The book provides accessible background information on how biomedical research is impacted by evolution, and defines neurobiology and neuropharmacology in ways that are easy to understand. At the same time, Pagán provides enough detail for the book to be useful for scientists working in various subsections of biology.

The planarian has played a key role in the history of biological, neuropharmacological, and zoological research, and has even made appearances in a few unexpected places in popular culture. Oné Pagán explores all these roles, and shows us why the planarian truly is one of the most extraordinary and influential organisms in scientific research today.

From reader reviews:

Rita Kirby:

Have you spare time for just a day? What do you do when you have much more or little spare time? That's why, you can choose the suitable activity intended for spend your time. Any person spent their own spare time to take a stroll, shopping, or went to the actual Mall. How about open or maybe read a book allowed The First Brain: The Neuroscience of Planarians? Maybe it is to get best activity for you. You already know beside you can spend your time with your favorite's book, you can better than before. Do you agree with the opinion or you have some other opinion?

Alexandra Dickey:

As we know that book is significant thing to add our knowledge for everything. By a book we can know everything you want. A book is a range of written, printed, illustrated or blank sheet. Every year was exactly added. This guide The First Brain: The Neuroscience of Planarians was filled regarding science. Spend your free time to add your knowledge about your science competence. Some people has diverse feel when they reading some sort of book. If you know how big good thing about a book, you can experience enjoy to read a reserve. In the modern era like now, many ways to get book which you wanted.

James McFarland:

That book can make you to feel relax. That book The First Brain: The Neuroscience of Planarians was bright colored and of course has pictures on the website. As we know that book The First Brain: The Neuroscience of Planarians has many kinds or type. Start from kids until teens. For example Naruto or Private eye Conan you can read and think you are the character on there. Therefore not at all of book tend to be make you bored, any it offers you feel happy, fun and loosen up. Try to choose the best book for you personally and try to like reading that.

Lisa Walker:

As a pupil exactly feel bored to help reading. If their teacher inquired them to go to the library or even make summary for some book, they are complained. Just minor students that has reading's spirit or real their pastime. They just do what the educator want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that reading is not important, boring as well as can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore , this The First Brain: The Neuroscience of Planarians can make you feel more interested to read.
