## Field Measurements for Forest Carbon Monitoring: A Landscape-Scale Approach

In the summer of 2003, a workshop was held in Portsmouth, NH, to discuss land measurement techniques for the North American Carbon Program. Over 40 scientists representing government agencies, academia and nonprofit research organizations located in Canada, the US and Mexico participated. During the course of the workshop a number of topics were discussed, with an emphasis on the following:

- The need for an intermediate tier of carbon measurements. This level of study would be more extensive than state-level inventories of the US Forest Service Forest Inventory and Analysis Program, but less detailed than intensive ecosystem studies sites such as those in Long Term Ecological Research network. This tier would ideally provide a basis to link and scale remote sensing measurements and inventory data, and supply data required to parameterize existing models (see Wofsy and Harriss 2002, Denning et al. 2005).
- The design criteria that such a network of sites should meet. The network and sampling design should be standardized, but flexible enough to be applied across North America. The design also needs to be efficient enough to be implemented without the need for large field crews, yet robust enough to provide useful information. Finally, the spatial scale must permit easy linkage to remotely sensed data.
- The key variables that should be measured at each site, and the frequency of measurement.

### **From reader reviews:**

#### **Donald Shelby:**

The book *Field Measurements for Forest Carbon Monitoring: A Landscape-Scale Approach* can give more knowledge and also the precise product information about everything you want. Exactly why must we leave the best thing like a book *Field Measurements for Forest Carbon Monitoring: A Landscape-Scale Approach*? A number of you have a different opinion about publication. But one aim that will book can give many data for us. It is absolutely proper. Right now, try to closer with your book. Knowledge or data that you take for that, you could give for each other; you could share all of these. Book *Field Measurements for Forest Carbon Monitoring: A Landscape-Scale Approach* has simple shape but the truth is know: it has great and large function for you. You can look the enormous world by start and read a reserve. So it is very wonderful.

#### **Kimberly Franks:**

Now a day individuals who Living in the era where everything reachable by interact with the internet and the resources inside can be true or not call for people to be aware of each details they get. How individuals to be smart in having any information nowadays? Of course the correct answer is reading a book. Studying a book can help folks out of this uncertainty Information specially this *Field Measurements for Forest Carbon Monitoring: A Landscape-Scale Approach* book since this book offers you rich data and knowledge. Of course the information in this book hundred per-cent guarantees there is no doubt in it everbody knows.

#### **Jose Banks:**

This *Field Measurements for Forest Carbon Monitoring: A Landscape-Scale Approach* is great publication for you because the content which can be full of information for you who else always deal with world and still have to make decision every minute. That book reveal it information accurately using great plan word or we can claim no rambling sentences within it. So if you are read the item hurriedly you can have whole info in it. Doesn't mean it only provides you with straight forward sentences but challenging core information with beautiful delivering sentences. Having *Field Measurements for Forest Carbon Monitoring: A Landscape-Scale Approach* in your hand like finding the world in your arm, data in it is not ridiculous one. We can say that no book that offer you world inside ten or fifteen tiny right but this publication already do that. So , this can be good reading book. Hey there Mr. and Mrs. stressful do you still doubt in which?

#### **Mary Lamm:**

Beside this specific *Field Measurements for Forest Carbon Monitoring: A Landscape-Scale Approach* in your phone, it might give you a way to get nearer to the new knowledge or details. The information and the knowledge you might got here is fresh from your oven so don't be worry if you feel like an aged people live in narrow town. It is good thing to have *Field Measurements for Forest Carbon Monitoring: A Landscape-Scale Approach* because this book offers to you personally readable information. Do you at times have book but you don't get what it's facts concerning. Oh come on, that won't happen if you have this in the hand. The

Enjoyable blend here cannot be questionable, like treasuring beautiful island. So do you still want to miss the item? Find this book and also read it from at this point!
