Complex Numbers: Lattice Simulation and Zeta Function Applications S C Roy

An informative and useful account of complex numbers that includes historical anecdotes, ideas for further research, outlines of theory and a detailed analysis of the ever-elusory Riemann hypothesis. Stephen Roy assumes no detailed mathematical knowledge on the part of the reader and provides a fascinating description of the use of this fundamental idea within the two subject areas of lattice simulation and number theory. Complex Numbers offers a fresh and critical approach to research-based implementation of the mathematical concept of imaginary numbers. Detailed coverage includes:

- Riemann's zeta function: an investigation of the non-trivial roots by Euler-Maclaurin summation.
- Basic theory: logarithms, indices, arithmetic and integration procedures are described.
- Lattice simulation: the role of complex numbers in Paul Ewald's important work of the 1920s is analysed.
- Mangoldt's study of the xi function: close attention is given to the derivation of $N(T)$ formulae by contour integration.
- Analytical calculations: used extensively to illustrate important theoretical aspects.
- Glossary: over 80 terms included in the text are defined.
- Offers a fresh and critical approach to the research-based implication of complex numbers
- Includes historical anecdotes, ideas for further research, outlines of theory and a detailed analysis of the Riemann hypothesis
- Bridges any gaps that might exist between the two worlds of lattice sums and number theory

From reader reviews:

James Johnson:

Book will be written, printed, or descriptive for everything. You can understand everything you want by a guide. Book has a different type. As you may know that book is important thing to bring us around the world. Beside that you can your reading ability was fluently. A guide Complex Numbers: Lattice Simulation and Zeta Function Applications will make you to possibly be smarter. You can feel far more confidence if you can know about everything. But some of you think that open or reading the book make you bored. It's not make you fun. Why they might be thought like that? Have you in search of best book or suitable book with you?

Rodney Richardson:

Spent a free time for you to be fun activity to accomplish! A lot of people spent their free time with their family, or their friends. Usually they carrying out activity like watching television, about to beach, or picnic from the park. They actually doing same every week. Do you feel it? Will you something different to fill your current free time/ holiday? Could be reading a book may be option to fill your free of charge time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to consider look for book, may be the book untitled Complex Numbers: Lattice Simulation and Zeta Function Applications can be excellent book to read. May be it is usually best activity to you.

Charles Collier:

A lot of people always spent their free time to vacation or go to the outside with them family members or their friend. Do you know? Many a lot of people spent many people free time just watching TV, or even playing video games all day long. In order to try to find a new activity that is look different you can read a book. It is really fun for yourself. If you enjoy the book that you simply read you can spent the entire day to reading a publication. The book Complex Numbers: Lattice Simulation and Zeta Function Applications it is very good to read. There are a lot of folks that recommended this book. These folks were enjoying reading this book. In the event you did not have enough space to develop this book you can buy the e-book. You can m0ore very easily to read this book from the smart phone. The price is not too costly but this book features high quality.

Samuel Freeman:

That reserve can make you to feel relax. This specific book Complex Numbers: Lattice Simulation and Zeta Function Applications was colorful and of course has pictures on the website. As we know that book Complex Numbers: Lattice Simulation and Zeta Function Applications has many kinds or category. Start from kids until adolescents. For example Naruto or Detective Conan you can read and believe you are the character on there. Therefore , not at all of book are usually make you bored, any it can make you feel happy, fun and rest. Try to choose the best book for yourself and try to like reading this.
