Electromagnetic Fields in Electrical Engineering

A. Savini, J. Turowski

Electromagnetic Fields in Electrical Engineering

A. Savini, J. Turowski

Electromagnetic Fields in Electrical Engineering A. Savini, J. Turowski
This book is the collection of the contributions offered at the International Symposium on Electromagnetic Fields in Electrical Engineering, ISEF '87, held in Pavia, Italy, in September 1987. The Symposium was attended by specialists engaged in both theoretical and applied research in low-frequency electromagnetism. The charming atmosphere of Pavia and its ancient university provided a very effective environment to discuss the latest results in the field and, at the same time, to enjoy the company or colleagues and friends coming from over 15 countries. The contributions have been grouped into 7 chapters devoted to fundamental problems, computer programs, transformers, rotating electrical machines, mechanical and thermal effects, various applications and synthesis, respectively. Such a classification is merely to help the reader because a few papers could be put in several chapters. Over the past two decades electromagnetic field computations have received a big impulse by the large availability of digital computers with better and better performances in speed and capacity. Many various methods have been developed but not all of them appear convenient enough for practical engineering use. In fact, the technical and industrial challenges set some principal attributes and criteria for good computation methods. They should be relatively easy to use, fit into moderately sized computers, yield useful design data, maintain flexibility with m1n1mum cost in time and effort.

From reader reviews:

Janet Magnuson:

The experience that you get from Electromagnetic Fields in Electrical Engineering may be the more deep you digging the information that hide inside the words the more you get considering reading it. It does not mean that this book is hard to be aware of but Electromagnetic Fields in Electrical Engineering giving you joy feeling of reading. The article author conveys their point in particular way that can be understood by means of anyone who read it because the author of this publication is well-known enough. That book also makes your own vocabulary increase well. That makes it easy to understand then can go to you, both in printed or e-book style are available. We recommend you for having that Electromagnetic Fields in Electrical Engineering instantly.

Evelyn Garcia:

Information is provisions for those to get better life, information presently can get by anyone on everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider whenever those information which is inside the former life are challenging be find than now could be taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you receive the unstable resource then you obtain it as your main information you will have huge disadvantage for you. All of those possibilities will not happen with you if you take Electromagnetic Fields in Electrical Engineering as the daily resource information.

Jason Braden:

Hey guys, do you wants to finds a new book to see? May be the book with the concept Electromagnetic Fields in Electrical Engineering suitable to you? The particular book was written by well known writer in this era. The actual book untitled Electromagnetic Fields in Electrical Engineeringis the main one of several books that will everyone read now. This specific book was inspired many men and women in the world. When you read this guide you will enter the new shape that you ever know before. The author explained their idea in the simple way, consequently all of people can easily to recognise the core of this reserve. This book will give you a wide range of information about this world now. To help you see the represented of the world in this book.

Stacie Schneider:

What is your hobby? Have you heard this question when you got students? We believe that that problem was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. So you know that little person similar to reading or as looking at become their hobby. You need to know that reading is very important and also book as to be the matter. Book is important thing to incorporate you knowledge, except your own teacher or lecturer. You find good news or update concerning something by book. Many kinds of books that can you choose to adopt be your object. One of them is this Electromagnetic Fields in Electrical

Engineering.
